

**Together we can make tobacco
become history**

Filling our minds with all these crazy lies,
We won't be brought down because we are all one of a kind.
Why do people smoke cigarettes, don't they realize
that smoking even one pack a day can cause you to die.

They trick, they kill, they lie.

Sold in neighbourhood stores where teens can just buy,
the store clerks sell them because they don't want to end up in a fight
the tobacco company is useless to all of these guys
to sum it all up they just continue to tell lies

They trick, they kill, they lie.

Tobacco causes lung cancer, is it really that good,
that people choose to suffer the pain;
living off of the addiction and being serene,
not even caring if the children are nice and clean.

They trick, they kill, they lie.

Living in a world where disease is on the rise
smoking that last puff might bring you to your demise.
Think about the generations that are to follow,
with tobacco in sight they will become so hollow.

They trick, they kill, they lie.

Cutting tobacco out will be a great solution
And the next step for us is making it a conclusion.
